Numbers don't lie.

The proof is in the productivity gains.
Calculate your ROI today.

During the writing of this eBook, we ran several online surveys to find out how organisations like yours were using Microsoft Teams, and how they are (and are not) using it to serve broader telephony and connectivity needs.

The results are interesting and make a solid case to re-evaluate how we integrate collaboration tools into the broader enterprise ecosystem.
47%

Percentage of those who switch between 4 or more communications applications daily. That's a lot of productivity lost to app-switching.
Only 11% of respondents think Microsoft's calling plans for Teams are reasonable.

11%

65%

Physical phones are being replaced by apps. 65% of you use computers as primary work communications devices.

8x8

61% of respondents would prefer to use the native Teams dialler for all phone calls.
61%

66% of you believe Teams is not prepared to support business-critical communications channels.

Only 25% of Teams customers we surveyed use it to make calls outside of their own organisation.

25%

65%

65% of respondents have contact centre agents use separate platforms to make up for shortcomings in Teams.

Next Steps

How did your organisation stack up? Get your personalised demo and learn how to maximise your investment with 8x8 Voice for Microsoft Teams.
