8x8 Voice + Microsoft Teams

The right time. The right approach.

[Read Blog](#)

As more IT leaders pick Microsoft Teams as their collaboration application, they are quickly running into the challenges and limitations of implementing a complementary enterprise voice solution. Not anymore.

Enter 8x8 Voice for Microsoft Teams, a cloud-to-cloud direct routing integration with the Microsoft Phone System, providing enterprise-grade telephony and global PSTN connectivity to customers that want to retain Microsoft Teams as their sole collaboration interface.

Save time and money by getting all of the benefits of a robust and global enterprise communications solution that is integrated with Teams without the hassle of managing a communications infrastructure, or changing your users' Teams experience.
